Symmetrical Internet

People have changed the way they are using the Internet. With the popularity of streaming video, online gaming, cloud storage and file sharing, people are uploading more than they ever have before. With traditional asymmetrical Internet, it took you longer to upload information than it did to download that same information.

We are proud to say that we are the **first and only Internet provider** in Sanpete County today to offer Symmetrical Internet to our residential customers! Now your upload speed can match your download speed at a fantastic price! For just \$10 more per month, you can make any of our Internet packages symmetrical!

With our **Symmetrical Internet**, you can upload pictures, videos, and files much faster than before, have less lag in your online gaming experience, and have smoother video calls with Skype! All for just \$10 more per month! If you haven't already signed up for Symmetrical Internet, call us today!

USE PROMO CODE: SYMNEWSLETTER and get 2 months of Symmetrical Internet for the price of 1! (a \$10 value, not available in all areas)

Counterfeit Bills in Sanpete County!

If you plan on coming to the Telephone Office and paying your bill with cash in the next few months, please plan on a few more minutes for our Customer Service Representatives to examine your bills (cash), due to the counterfeit money that has been circulating around Sanpete and Sevier Counties recently. We hope this will not inconvenience any of you but feel it is necessary to protect ourselves and of course you, our customers.

The fake money has been discovered in denominations of \$5, \$10, \$20 and \$50. "They are pretty good bills," Interim Police Chief Brett McCall said. "The hue is a little off on these but if you have a few other bills in your wallet, you're really not going to notice. It's quite an operation." While the police pursue a permanent end to the circulation of the fake money, McCall said there are some ways the public can protect themselves.

He said when a bill worth \$5 or more is held up to light, a security strip and a watermark will appear with the light shining from behind it. Color-shifting ink is another way to tell if a bill is real or fake. Take the \$20 bill for example; the number 20 on the bottom right hand corner will have a copper color when you are looking straight at it. But if you rotate the top of the bill down so that the bill looks flatter to your eye, the "20" will turn more of a greenish color. All denominations of \$5 or more have this security feature, going back to 1996.

McCall said perhaps the most commonly used money authentication method is the brown markers often used in retail locations, but this method will not likely help catch the batches of funny money in Sanpete County. Although he said he doesn't know precisely how the bills are being produced, he strongly suspects counterfeiters are bleaching \$1 bills white and then somehow printing the image of a higher denomination bill onto the blank \$1. Because of this method of counterfeiting, the brown markers, which are designed to react to non-standard paper, are rendered ineffective at catching fakes.

If you think you have a fake bill or if you have information about counterfeit currency, contact your local police department or the Sanpete County Sheriff's Office dispatch at (435) 835-2345. Those who live in Gunnison Valley should contact Officer Tyler Donaldson.
