Free Wi-Fi Summer

Ends September 5th.

We would like to thank everyone who participated in our Free Wi-Fi Summer, especially all of our incredible sponsors and everyone who used the Free Wi-Fi at the various locations.

*Big G Auto
Biggies (Moroni)
Candies on Main
Ephraim City
Ephraim Family Dental
Freedom Ford (Gunnison)
Griffyn*

*Kopy Katz
KZ's
Los Amigos
Manti City
Market Fresh
Risk Managers, LLC*

Be sure to visit these great local businesses for special promotions and discounts during the Free Wi-Fi Summer event!

For a complete list of sponsors and a coverage map, please visit:
<http://www.manti.com/freewifi>.

Online Chat

We are excited to announce that we have added an online chat option to our website (www.manti.com)! Now help is just a click away!

We are in the process of training all of our staff on how to use this great new feature, and our goal is to have the chat option available to customers both during and after hours. If one of our customer service reps is not available, you will be prompted to submit an email and we will answer your question as soon as we can.

We also recommend checking out our FAQ section on our support page for answers to some common questions (www.manti.com/support), or post on our Facebook page (www.facebook.com/mantitelecommunications) and we will answer as soon as we can.

Join the Gig-sanity!

1 Gbps Internet Download Speeds Now Available!

We invite you to join the **Gig-sanity** by signing up for one of our great new Internet packages. We have the speeds you need to get the job done, and prices to meet any budget!*

Plus, we are now including the cost of a phone line with Internet packages of 50 Mbps or higher! That means you can get our 50 Mbps Internet package with a phone for only \$69.95 plus taxes! *

Price	Download Speed	Upload Speed
\$249.95	1 Gbps	300 Mbps
\$149.95	500 Mbps	100 Mbps
\$119.95	200 Mbps	50 Mbps
\$89.95	100 Mbps	15 Mbps
\$69.95	50 Mbps	10 Mbps
\$49.95	20 Mbps	5 Mbps
\$39.95	10 Mbps	3 Mbps

*Speeds not available in all areas. Some restrictions may apply. Customer is responsible for taxes of approximately \$10-12 on phone line.

GIG SANITY!

How Fast Is Your Internet?

Internet is everything these days...and we mean EVERYTHING!

What Internet Speed do you have?

The internet brings the world to you...on your computer screen, in your pocket, on your TV...and now even on your watch. You can stream movies, shop online, pay your bills, listen to music, chat with friends or family in another country, research an important topic, check the weather in Switzerland, see the world from above, watch YouTube® videos until your heart's content and even ask someone you don't know very well out on a date. Man...that's a lot of stuff, and we've barely scratched the surface!

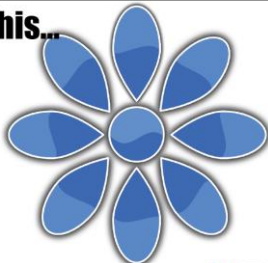

Ok, ok, we know that the internet is everything these days, but what you may NOT know is that you need a fast internet speed to keep up with the internet...a lot faster than you used to! Did you know that the definition of Broadband internet is a speed of 25mb download and 3mb upload? Yeah, that's about 5 times faster than what it used to be! Why do we need such fast speeds today? Because there is more bandwidth consuming content on the internet than ever before, (photos, videos, online gaming, etc.), and more and more devices are connecting to the internet per household, and, let's face it, we just use the internet for...well...everything.

So here is the tell all question...what internet speed do YOU have? When asking this question to our customers, most tell us that they have our fastest speed. Why do they tend to say that? Because we have fiber internet to the home. They just assume that they have the fastest internet because they have fiber. While we wish that we could say that was true...we can't. Fiber is the way of the future. Fiber can carry more information much more efficiently and allows for super-fast speeds of internet up to a gig and beyond. But, we do offer different speeds at different prices to fit the needs of our customers. Just so you know, about 75% of our customers actually have our SLOWEST speed...yep, you read that right, our SLOWEST speed...and our slowest speed isn't even all that slow. The slowest speed that we offer is 10mb x 3mb...which is nothing to be ashamed of...but that speed is quickly becoming TOO slow to handle the internet demands of today. Again, going back to the definition of Broadband, the Federal Communications Commission defines it as 25mb X 3mb. That means they suggest that you have at least that speed to handle the internet demands of today.

Do you know what speed you have? If not, give us a call and we will tell you. If you feel that your internet speed is too slow...we can help you with that. We are discovering that more and more of our customers are upgrading to 50mb X 10mb and higher. Why? Because if you have 5 people in your home with an average of 3 devices per person ALL connected to the internet at the same time demanding the same internet...you just need faster speeds. Give us a call today and get the speed that you need!!

Things That Are Symmetrical

This...

& Symmetrical Internet From 

Symmetrical Internet

With **Symmetrical Internet**, you can upload pictures, videos, and files much faster than before, have less lag in your online gaming experience, and make smoother video calls with Skype! All for just \$10 more per month! If you haven't already signed up for Symmetrical Internet, call us today!
