

Fiber-to-the-home connections are the only technology with enough bandwidth to handle projected consumer demands over the next decade and the foreseeable future.

What does this mean to you?

Fiber-to-the-home means Faster, More Reliable Internet Speeds, Better Video Streaming, Better Performance over Multiple Devices, and Flexibility for the Future. With FiberFast Internet from MTCC, you have the best technology at your fingertips.

Fast Upload Speeds

It's a fact. People have changed the way they are using the Internet. They are connecting with more devices, in more ways than ever before. With the increased popularity of social media sites and cloud-based services (Facebook, YouTube, DropBox, Google Drive, etc.) people are also uploading more than ever before.

With FiberFast Internet from MTCC, you will receive faster upload speeds than our competitors on all of our packages; allowing you to truly do more, faster!

TechLink

Need help setting up a router? Not sure how to hook up your new Smart TV to your wireless network? Have a network printer that you can't get to connect?

Avoid costly service charges, and sign up for our TechLink service plan today! Let our experienced, knowledgeable staff do the work for you! We will connect your devices...whether it is today, tomorrow, or 6 months down the road!

Plan starts at \$45 for 6 months of coverage.*

*Includes connection of devices, phone support, priority service, and existing wire maintenance. Any new wiring would require additional fees.

Tech Support

Can't connect to the Internet? Can't access your email? We are here to help! At MTCC we strive to give our customers the best customer service and technical support we can give. We can usually help solve most issues with you over the phone, or we can come to your location to help with some of the tougher issues. If you are having any trouble at all, please give us a call at 435-835-2929 or visit our Support website at www.manti.com/support.

"LOVE THE FIBER INTERNET SERVICE. SPEED TESTS SHOW THAT 50 MBPS MEANS 50 MBPS. CUSTOMER SERVICE IS GREAT AS WELL!"

- J. PIPES

Wireless Security

Today, it seems like everyone has at least four or five wireless devices connected to the Internet, whether it is a smartphone, tablet, laptop or gaming console. What a lot of people don't realize is that their wireless connection may not be secure, and other people may be stealing their Internet!

To avoid this, we recommend making sure that your wireless router is password protected. Most wireless routers now come with a preset password already on them, but we recommend double checking to make sure your router is secure. Need help? Ask us how!

FIBERFAST INTERNET
