

Protection for your family. Peace of mind for you.

Thanks to **Pharos**,
having a secure home is now
affordable.

Using your internet connection or smart
mobile device, you can:

- View live surveillance video feed
- Receive alarm alerts
- Control security including
remote door locks
- Monitor motion detection
- Manage your energy usage
- Control your thermostat remotely
- Monitor carbon monoxide
- Detect water leaks

Home control, family protection, and added freedom.

Pharos offers home automation solutions you
control from any smart mobile device or Internet
connection. Especially comforting for parents, it
lets you unlock a door to let children in and secures
the door behind them; or you can simply receive
an email when they arrive home from school.

Save money through energy efficiency, monitor
your vacation home, or even be alerted if your
elderly family member hasn't moved throughout
the house. Enjoy the peace of mind of true home
monitoring.

Pharos Smart Solutions Overview

Pharos offers affordable, easy-to-use management
tools and the ability to control devices that redefine how
you live and work today.

Sensors, devices, locks, lighting, energy management, and more...

Smart Locks
Locks that can be programmed to activate lights and adjust the thermostat.

Smoke and Carbon Monoxide Detectors
Detectors can send standard audible alerts, and can be programmed to turn on loud siren with flashing light, take pictures, unlock the door, send text/email alert, and more.

Keychain Fobs
Multi functional, sleek and tough, this smart key fob provides control over motion sensors, thermostats, lighting and much more.

Door/Window Sensors
Sensors are slim and small to not distract from your home's cosmetic appeal; sensitive, reliable contacts avoid false alarms.

Indoor Power Outlets
Control a lamp, appliance, or other electrical device with a simple on/off switch on your smart phone; just plug into an outlet.

Outdoor Power Outlets
Same functionality as indoor outlet designed with more durability; unit must remain dry from weather and water contact.

Medical Alert Pendant
Device sends alert notifications via text, email or text to voice message and provides notification that help is on the way.

Biosign Pulsewave™ Monitor
Pulsewave is the FDA certified coupling device that fits comfortably on a person's wrist to measure blood pressure, heartbeat, breathing rate and other important vital signs. Results are stored in the Cloud and alert notifications as well as routine information can be provided to individuals, loved ones and caretakers.

Smart Home Monitoring
Total Control of your home

Smart Thermostat
Programmable thermostat designed for monitoring and controlling most heating and air conditioning units. Can be accessed remotely from PC, tablet or smartphone.

Motion Sensors
Device detects motion and can be easily programmed to send notifications via text, email or text to speech.

Multi-Sensor
Detects motion, relays temperature, lighting, and humidity conditions all in one unit.

Water Sensor
Designed for areas prone to water leak, flooding, or other fluid overflows. If probes and prongs detect liquid, a notification is sent out via text, email, or text to voice.

Loud Siren/Flashing Red Light
Low cost home security device that triggers extreme sound and light to deter intruders.

Quality IP Camera
High-resolution video camera captures video clips when an event is triggered (i.e. doors opening, motion detected and window or door sensor activity).

Snapshot Camera
High-resolution video camera takes snapshots when an event is triggered (i.e. doors opening, motion detected and window or door sensor activity).

Commercial Quality Camera
This 2 megapixel indoor/outdoor commercial quality camera provides complete surveillance, inside or outside.

Home Energy Monitoring Kit
A Low-cost monitoring solution to report wattage and kilowatt usage; easy to install and safe to use.
