

## Changing Mail Server on Android Device

Open mail program

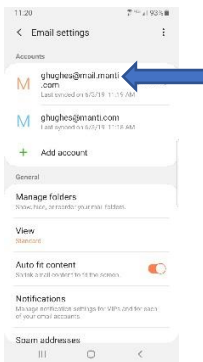

Click on three lines in the upper left-hand corner

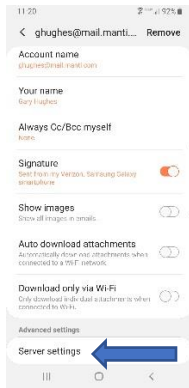

In upper right-hand corner of new window, click on the gear symbol

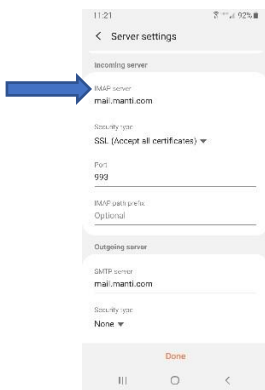

Click on "mail.manti.com" account

Scroll to the bottom, click on “server settings”

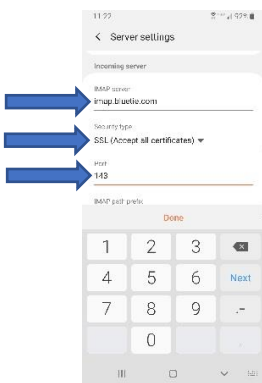

Under “Incoming mail server” notice the type of server (IMAP or POP)

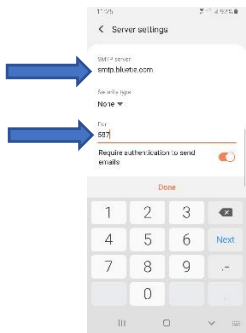

If IMAP: change incoming server to “imap.bluetie.com,” change port to 993

If POP: change incoming server to “pop.bluetie.com,” change port to 995

Security type: SSL (Accept all certificates)

Under “Outgoing mail server” change outgoing server to “smtp.bluetie.com,” change port to 587

Click “Done”
