WebGuide

We've all been there.

You're away from home when the panic hits – you forgot to record your wife's favorite show!

Normally this would mean a very uncomfortable night on the couch and a lot of evil looks from your wife.

But you can avoid all those "remember when you forgot to" conversations by using our **WebGuide** service.

WebGuide allows you to set recordings remotely – from anywhere you have internet access!

Now you can be her hero instead of a zero!
