FIBERFAST INTERNET

WHAT SPEED DO I NEED?

For the best streaming experience, most of the popular streaming apps are recommending a minimum of **25 Mbps per stream**. If you are streaming these apps on more than one device at time, your bandwidth requirements will increase accordingly.

For most customers, we recommend a minimum of:

75-100 Mbps.

*While these apps will work at slower speeds, your experience will be less than ideal. Disney+, Hulu, Netflix, Amazon Prime, and Apple TV logos are registered trademarks of their respective companies and are not affiliated with MTCC. All rights reserved.

FAMILYUP

When your family comes to visit, does your internet slow down? All those extra devices chew up your bandwidth in a hurry, making your internet sluggish.

Give your internet a boost with **FamilyUp** and make everyone happy! **FamilyUp** plans temporarily increase your internet speed while your family is here, then go back to normal when they leave.

Now everyone will love coming to your house even more!

Get a 5-Day **FamilyUp** boost for just

\$10

 per tier jump!

*All FamilyUp plans are for 5 days. Prices are in addition to your normal bill. Speeds reflect a temporary upgrade and will automatically be reduced to your normal plan after the 5-day period is over. Not available in all areas.
